EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

Vellore, India

Aug. 2024 – Present

- **Relevant Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (C, C++, Java), Cloud Computing, Operating Systems, Database Management Systems (DBMS), System Architecture, Web Programming.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript (ES6+), Bash, Unix Shell Scripting, SQL

DevOps & Cloud: Docker, Kubernetes (K8s), AWS Cloud, Azure Cloud, Linux/Unix Commands, CI/CD Automation, Bash Scripting, Cron Jobs

Frontend & Web: React.js, HTML5, CSS3, Tailwind CSS, Vite, RESTful APIs

Backend & Databases: Microservices Architecture, RESTful APIs, MongoDB, MySQL, System Architecture

Tools & Infrastructure: Git, GitHub, Linux/Unix CLI, VS Code

EXPERIENCE

EronKan Technologies Pvt. Ltd.

Cloud and DevOps Intern

Ahmedabad, Gujarat

May 2026 – July 2026

- **Architected Industry 4.0 Cloud Infrastructure:** Deployed real-time machine telemetry automation pipelines processing high-frequency data streams across **1,000+ active packaging lines**.
- **Engineered K8s/Docker Microservices:** Deployed containerized microservices on **AWS/Azure Cloud**, driving **99.9% platform uptime** and **OEE tracking optimization**.
- **Automated CI/CD & Factory Telemetry:** Implemented custom **Bash, Cron, and Unix CLI automation scripts**, slashing data pipeline latency and eliminating manual reporting.

Hex Softwares Pvt. Ltd.

Java Programming Intern

Remote

Jan 2026 – Feb 2026

- **Developed Enterprise Java Microservices:** Engineered scalable backend modules (Inventory, Booking) applying strict **Object-Oriented Programming (OOP)** principles.
- **Implemented Zero-Trust RBAC Security:** Built RESTful CRUD APIs with **Role-Based Access Controls (RBAC)**, enforcing strict data integrity across enterprise modules.
- **Spearheaded Git Version Control:** Managed modular **Git/GitHub** workflows, enforcing code review standards and technical architecture documentation.

PROJECTS

VITspotCheck: Campus Intelligence Platform | React, Tailwind CSS, Vite

Live | GitHub

- **Built Real-Time Campus Intelligence Engine:** Developed crowdsourced room availability tracking and dynamic zone rendering using **React.js, Tailwind CSS, and Vite**.
- **Optimized UI State & Rendering:** Engineered zero-latency classroom search and high-throughput interactive campus navigation.

JavaScript Utilities Project | JavaScript (ES6+), HTML5, CSS3

Live | GitHub

- **Engineered Zero-Dependency Benchmarking Engine:** Built a client-side **DOM throughput** and event processing performance analyzer in **vanilla JavaScript (ES6+)**.
- **Delivered High-Efficiency Profiling Tooling:** Designed interactive UI/UX benchmarking modules with zero external runtime dependencies.

UNMESSIFY: Smart Mess Credit Planner (Co-developed) | JavaScript, Chart.js, HTML5, CSS3

GitHub

- **Architected Mess Credit Decision Portal:** Analyzed spending patterns for **6,000+ monthly credits** using multi-window burn rate predictive models and **Chart.js**.
- **Formulated Predictive Budgeting Models:** Implemented confidence-threshold forecasting algorithms to eliminate credit exhaustion overruns.

- **Engineered Normalized Health Analytics System:** Designed a **Python/MySQL** health portal with normalized schemas for instant medical record indexing.
- **Programmed Automated Diagnostic Engine:** Developed real-time BMI classification algorithms and predictive vaccination tracking alerts.

TECHNICAL CONTRIBUTIONS

- **Competitive Problem Solving:** Active practitioner across **LeetCode & HackerRank**, applying **Data Structures & Algorithms (DSA)** for optimal time & space complexity solutions.
- **Campus Tech Leadership:** Active contributor to India's **renowned tech chapters & university clubs**, hosting technical developer workshops and campus hackathons.
- **Workflow & Shell Automation:** Designed lean **Unix/Linux automation scripts** to eliminate repetitive developer tasks and maximize engineering throughput.
- **Hackathon Excellence:** Secured **Top 15% rank** in campus-wide hackathons by delivering rapid, production-ready backend prototypes under tight deadlines.
