EDUCATION

Vellore Institute of Technology Vellore, India

Bachelor of Technology in Computer Science and Engineering *Aug. 2024 – Present*

- **Relevant Coursework:** Data Structures & Algorithms, Design and Analysis of Algorithms, Object-Oriented Programming in C,C++ and Java, Computer Architecture, Web Programming, Python and Java Fundamentals.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, SQL **Frontend**: React.js, HTML5, CSS3 **Backend/Databases**: RESTful APIs, MongoDB, MySQL

Tools & Platforms: Git/GitHub, Postman, VS Code, IntelliJ, Linux

EXPERIENCE

Hex Softwares Pvt. Ltd. Remote

Java Programming Intern *Jan 2026 – Feb 2026*

- **Worked on** scalable **Java-based** enterprise modules (Inventory, Leave Management, Travel Booking), **streamlining core business operations** for simulated real-world workflows.
- **Helped engineer** modular backend architectures utilizing strict **Object-Oriented Programming (OOP)** principles to **enhance code maintainability and separation of concerns**.
- **Learnt to Implement** secure CRUD operations and role-based access controls (RBAC), **ensuring robust data validation** across enterprise applications.
- **Maintained** highly organized project repositories using **Git/GitHub** for version control, **facilitating seamless remote collaboration and comprehensive documentation**.

PROJECTS

UNMESSIFY: Smart Mess Credit Planner | *JavaScript, Chart.js, HTML5, CSS3* Live | GitHub

- **Engineered** a web-based decision support system using **JavaScript, HTML5, and CSS3**, optimizing 6,000+ in monthly mess credits and **preventing budget exhaustion through predictive analytics**.
- **Developed** a multi-window burn rate analysis and credit exhaustion prediction model, **improving forecasting accuracy** through established confidence thresholds.

MedRep: Student Health Analytics Portal | *Python, MySQL* GitHub

- **Built** a **Python-based** health record management system, implementing a normalized **MySQL** relational schema to ensure **data integrity and rapid retrieval** of structured medical records.
- **Programmed** an automated diagnostic engine in **Python** to compute BMI classifications and trigger predictive vaccination alerts, **enhancing preventative healthcare tracking**.

VITspotCheck: Campus Intelligence Platform | React, Tailwind CSS, Vite **Live** | **GitHub**

-- **Developed** a real-time campus intelligence platform featuring crowdsourced room availability and **network mapping**.

-- **Implemented** complex campus **zone mapping** and classroom selection logic into an intuitive interface.

JavaScript Utilities Project | JavaScript, HTML5, CSS3 **Live** | **GitHub**

-- **Built** a collection of experimental **UI/UX patterns** and **JavaScript** optimization tools.

-- **Developed** an interactive **data analyzer** for throughput measurement without external library dependencies.

ACHIEVEMENTS & CERTIFICATIONS

- **Competitive Programming:** Mastered advanced Data Structures and Graph Algorithms by **solving 50+ complex problems** across LeetCode and HackerRank.
- **Hackathons:** Achieved a **top 15% ranking** in campus-wide hackathons by delivering rapid, scalable backend prototypes under strict time constraints.
